Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d), effective Nov. 1, 1984, provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on applications filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(k) or (l), as amended effective Oct. 5, 1985. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the grant.

Attention is drawn to the patents which were issued on October 9, 1984, for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,475,247 through 4,476,586
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

The current amounts of the maintenance fees due at 3 years and six months are set forth in 37 CFR 1.20(e) and

(h), as amended effective Oct. 5, 1985, which are reproduced below:

37 CFR §1.20 Post-issuance fees

"(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 and before Aug. 27. 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant . . . $ 225.00"

"(h) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Aug. 27, 1982, in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§1.9(f)) . . . . . $ 225.00
By other than a small entity . . . . . $ 450.00"

The amounts of the surcharges as amended effective Oct. 5, 1985, are set forth in 37 CFR 1.20 (k) and (l) which are reproduced below:

"(k) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980 and before Aug. 27, 1982 . . . . . $ 110.00"

"(l) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Aug. 27, 1982:

By a small entity (§1.9(f)) . . . . . $ 55.00
By other than a small entity . . . . . $ 110.00"

Section 1.20 paragraph (m) as amended as a result of enactment of Public Law 98-622 effective Nov. 8, 1984, is reproduced below:

"(m) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay in payment is shown to the satisfaction of the Commissioner to have been unavoidable . . . . . $ 500.00"

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

Patent and Trademark Office
Board of Patent Appeals and Interferences Vacancies

The Board of Patent Appeals and Interferences will be filling a number of Examiner-in-Chief vacancies over the next several months. Positions are available in chemical, electrical, and mechanical technologies. Persons interested in being considered for these vacancies are invited to submit individual applications for each of the following vacancy announcements:

PTO-87-A6-chemical technology, PTO-87-A7-electrical technology, and PTO-87-A8-mechanical technology. There is no deadline for submitting applications. However, candidates are urged to apply as soon as possible since applications will be accepted only until the positions are filled.

Excerpts from the vacancy announcements describing the duties of the position, qualification requirements, factors to be used in evaluating candidates, and necessary application materials are listed below.

Duties: Serves as a member of the Board of Patent Appeals and Interferences of the Patent and Trademark Office. As an Examiner-in-Chief, participates in the Board's appellate and administrative responsibilities and exercises independent judgment on all matters before him/her on appeal, subject to administrative and policy direction of the Commissioner, and may be responsible for conducting interlocutory proceedings in interference and for determining questions of priority of invention and patentability between interference parties. Appeals filed in accordance with 35 USC 134 and interferences declared in accordance with 35 USC 135 involve complex legal and technical questions. The Board of Patent Appeals and Interferences has the sole power to:

(1) hear and adjudicate appeals from decisions of the Primary Examiners as to patentability in applications for patents, for reissue of patents, and for reexamination of patents;
(2) to declare and to conduct proceedings in interferences; and
(3) to determine priority of invention.

Final decisions of the Board, if unfavorable to an applicant, or to a party to an interference, may be appealed to the United States Court of Appeals for the Federal Circuit or civil action may be taken in accordance with 35 USC 145, or 35 USC 146.

Qualification requirements: In addition to a technical degree, candidates must possess:

(1) A minimum of five years of comprehensive patent experience of which at least two years involved the exercise of independent judgment in a responsible position as typified by the exercise of Full Signatory Authority as a Patent Examiner or by comparable experience in some other position inside or outside the Patent and Trademark Office;
(2) A law degree and membership in good standing of the bar in any state, D.C., Puerto Rico, or any territorial court under the Constitution;
(3) A high degree of demonstrated competence in chemical, electrical, or mechanical technology;
(4) A high degree of demonstrated competence and knowledge of interference law and practice;
(5) Demonstrated ability to determine whether or not tests which are submitted in evidence are technically sufficient to prove the question at hand;
(6) Demonstrated ability to write clearly, and to write logically developed opinions;
(7) Demonstrated ability to use legal and technical background to evaluate testimony of witnesses;
(8) Demonstrated ability to deal effectively with people within and outside the Patent and Trademark Office; and
(9) Comprehensive experience in patent prosecution, examination, or administration which demonstrates a thorough knowledge and application of patent laws and rules of practice.

Factors which will be considered in evaluating qualified candidates: Candidates will be evaluated on the total range of their education, training and experience as well as supervisory appraisals and questionnaire responses.

Interested candidates should submit the following:

(1) Personal Qualifications Statement, SF-171;
(2) Merit Program Interest Statement, CD-261 (PTO employees only);
(3) Current supervisory appraisal on your agency's form or on CD-362 (letters of reference for outside candidates);
(4) Annual narrative performance rating, or equivalent;
(5) Examiner-in-Chief Questionnaires; and
(6) Samples which evidence your writing ability.

Questions concerning this notice and requests for application materials should be directed to Ms. Suzanne Waddill, Office of Personnel, One Crystal Park, Suite 700, Arlington, Va., telephone (703) 557-3631.

Notice of Examination for Registration
Wed., Apr. 13, 1988

Pursuant to the provisions of 37 C.F.R. §§10.5, 10.6 and 10.7, an examination for persons seeking registration

before the United States Patent and Trademark Office as patent attorneys and agents will be held on *Wed., Apr. 13, 1988*. The deadline for filing applications along with the $250 fee and all necessary showings required by 37 CFR §§[10.7(a) and (b) is *Jan. 31, 1988*.

With the exception of those persons who actively served four years or more in the examining corps of the Patent and Trademark Office for whom the examination is waived, all persons recognized for practice before the Patent and Trademark Office in patent cases must, pursuant to the noted rules, pass the examination. Note: those passing the examination do not qualify for recognition for practice before the Patent and Trademark Office in trademark cases. Recognition for practice in trademark cases is governed by 37 C.F.R. §10.14, which does not require the passing of an examination.

Any candidate who has failed to pass the examination after *three* opportunities and who desires to retake the examination a fourth time must submit with his or her application an affidavit giving a list of the studies pursued by him or her since the last examination, and the time occupied with them together with a certificate by the person under whose direction he or she has studied, showing that the candidate has so studied during a period of at least one year.

Any candidate who has failed to pass the examination after *four* opportunities and who desires to retake the examination for a fifth time must submit an affidavit with his or her application giving a list of studies pursued by him or her since the last examination, and the time occupied with them together with a certificate by the person under whose direction he or she has studied, showing that the candidate has so studied during a period of at least one year. The showing for admission to the fifth examination must be different from and more extensive than that for the fourth examination and must establish to the satisfaction of the Director of Enrollment and Discipline that the studies pursued by the candidate will more likely result in the candidate passing the examination.

Any candidate who has failed to pass the examination after *five* opportunities and who desires to retake the examination again will not be permitted to retake the examination unless admission to the examination is granted by the Director of Enrollment and Discipline upon written request by the candidate establishing extraordinary circumstances which would justify the candidate's admission.

Any officer or employee of the United States government who passes the examination, but whose official duties *do not* require the preparation and prosecution of applications for patent, will be endorsed as inactive on the register of attorneys and agents. (18 U.S.C. §§203 and 205).

Under 37 CFR §10.7(b), persons seeking registration must submit "satisfactory proof of good moral character and repute and of sufficient basic training in scientific and technical matters. . . ." The initial submissions of many persons not having degrees in physics, chemistry and engineering are usually inadequate, and often must be supplemented before such persons are approved to take an examination. To afford adequate time to present a satisfactory supplemental showing, it is recommended that persons file their applications early, preferably *at least two months* before the Jan. 31, 1988 deadline. Supplemental showings of qualifications and applications received after Jan. 31, 1988 will be considered only in connection with admission to the next succeeding examination.

The examination will be given under the supervision of the Office of Personnel Management and may be taken at specific locations in which the Office of Personnel Management conducts this examination.

Application blanks may be obtained from the Office of Enrollment and Discipline, Suite 810, Crystal Park 1, 2011 Crystal Dr., Arlington, Va. or by mail addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231, and directed to the attention of the Office of Enrollment and Discipline.

Preparation for Processing High Temperature Superconductor Technology

In response to the President's Superconductivity Initiative announced on July 28, 1987 and with the expectation of the filing of increasing numbers of patent applications relating to higher temperature superconductors, the U.S. Patent and Trademark Office has taken a number of steps to prepare for the effective handling of applications on this subject matter.

These actions include (1) establishing a special Task Force to prepare for the processing of patent applications for higher temperature superconductor technology; (2) making patent applications relating to this technology special on request of the applicant and (3) renewing support for legislation providing for an expanded scope of protection for process patents to cover products made by the patented process.

The responsibilities of the Task Force are to (1) coordinate the development of a Patent and Trademark Office capability to examine the expected large number of patent applications in this area and (2) provide an information resource and sounding board for legal and practice questions and policy development in this area. The Task Force has been assigned a number of specific tasks, such as developing a complete search file on superconductivity technology for the use of Examiners and the public, establishing a training program for examiners on the technology and assuring a uniform and consistent application of the patent law to the technology in the U.S. Patent and Trademark Office.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Parts 1 and 5

[Docket No. 70754-7154]

Miscellaneous Amendments of Patent Rules

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Patent and Trademark Office proposes amendments to the rules of practice in patent cases, Parts 1 and 5 of Title 37, Code of Federal Regulations, (1) to bring the rule relating to swearing back of a reference into conformity with current interference practice; (2) to limit the length of the appellant's brief and reply brief in an *ex parte* appeal, and require that the brief contain certain specific items; (3) to reset the time period for requesting an oral hearing in *ex parte* appeals where the examiner's answer states a new ground of rejection; (4) to clarify the procedure following a final rejection after a remand to the examiner under § 1.196(b)(1); (5) to give the examiner-in-chief the authority to decide certain requests for access by an interference party; (6) to clarify the rule relating to access to pending or abandoned applications; (7) to modify the rules concerning requests for interference with an application or patent; (8) to amplify the rule concerning the requirements of a motion to declare an additional interference; (9) to more clearly define the application of interference estoppel; (10) to make more comprehensive the rule concerning the filing of a reissue application by a patentee involved in an interference; and (11) to conform the rule concerning applications under secrecy order to current interference practice.

DATES: Comments and suggestions should be received by December 1, 1987. A public hearing will be held on December 9, 1987, beginning at 9:00 a.m.; requests to make oral presentations at the hearing should be received on or before December 1, 1987.

ADDRESSES: Address written comments to Box Interference, Commissioner of Patents and Trademarks, Washington, DC 20231. The public hearing will be held in Room 11C10, Crystal Plaza Building 3, 2021 Jefferson Davis Highway, Arlington, Virginia. Written comments and a transcript of the public hearing will be available for public inspection in Room 10C01, Crystal Gateway II, 1225 Jefferson Davis Highway, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: Saul I. Serota by telephone at (703) 557-4072 or Ian A. Calvert by telephone at (703) 557-4000 or by mail marked to the attention of either and addresed to Box Interference, Commissioner of Patents and Trademarks, Washington, DC 20231.

SUPPLEMENTARY INFORMATION:

(1) Swearing Back of a Reference

The Patent and Trademark Office published its notice of final rule amending the rules of practice in patent interference cases in the **Federal Register** of December 12, 1984 (49 FR 48416 through 48471) and in the Official Gazette of January 29, 1985 (1050 O.G. 385 through 440). Included in the rules adopted was § 1.601(n), which defines "same patentable invention."

Section 1.131(a), if amended as proposed, would insert "the same patentable invention, as defined in § 1.601(n), as" before the phrase "the rejected invention". The amendment does not change the present practice where the inventor of the rejected claim, the owner of a patent under reexamination, or the person qualified under §§ 1.42, 1.43 or 1.47 can swear behind a domestic patent which disclose but does not claim the same invention as the rejected invention, a foreign patent or a printed publication. Rather, the amendment is necessary to define precisely the term "does not claim the rejected invention." See *In re Eickmeyer*, 602 F.2d 974, 202 USPQ 655 at 661 (CCPA 1979) where the Court stated:

> * * * we conclude that the phrase "does not claim the rejected invention" should be construed favorably to an applicant, if possible, so that unless the applicant is clearly *claiming the same invention* as the U.S. patent reference, he will not lose his rights under Rule 131. [Emphasis added.]

and also expressed its dissatisfaction with the PTO for

> * * * leaving an applicant in a position where he cannot overcome the reference claims by a 131 affidavit because the PTO has decided that the reference claims his invention, while at the same time, he is denied an interference because the PTO has decided that the claims of his application and those of the reference are not for substantially the same invention.

Possibly because of this decision, some patent practitioners seem to have been of the opinion that an affidavit under 37 CFR 1.131 can be used to overcome a rejection on a domestic patent so long as there is no verbatim correspondence between the claims of the application or the patent under reexamination rejected on that domestic patent and the claims of the domestic patent.

Such an opinion is not in accord with the law expressed in such cases as *In re Clark*, 53 CCPA 954, 457 F.2d 1004, 173 USPQ 359 (1972); *In re Hidy*, 49 CCPA 1152, 303 F.2d 954, 133 USPQ 650 (1962); *In re Teague*, 45 CCPA 877, 254 F.2d 145, 117 USPQ 284 (1958); and *in re Ward*, 43 CCPA 1007, 236 F.2d 428, 111 USPQ 101 (1956). In *In re Hidy*, supra, 133 USPQ at 652, the Court stated:

> A Rule 131 affidavit is ineffective to overcome a United States patent, not only where there is a verbatim correspondence between claims of the application and of the patent, but also where there is no patentable distinction between the respective claims. *In re Wagenhorst*, 20 CCPA 829, 62 F.2d 831, 16 USPQ 126; *In re Teague*, 45 CCPA 877, 254 F.2d 145, 117 USPQ 284.

If the application (or patent under reexamination) and the domestic patent contain claims which are identical, or which are not patentably distinct, then the application and patent are claiming the "same patentable invention," defined by § 1.601(n) as follows:

> Invention "A" is the "same patentable invention" as an invention "B" when invention "A" is the same as (35 U.S.C. 102) or is obvious (35 U.S.C. 103) in view of invention "B" assuming invention "B" is prior art with respect to invention "A".

As provided in § 1.601(i), an interference may be declared whenever an examiner is of the opinion that an application and a patent contain claims for the "same patentable invention." The purpose of the proposed amendment to § 1.131(a) is to insure that an applicant who is claiming an invention which is identical to, or obvious in view of, the invention claimed in a domestic patent cannot employ an affidavit under § 1.131 as a means for avoiding an interference with the patent. To allow an applicant to do so would result in the issuance of two patents to the same invention.

Section 1.131(b), if amended as proposed, would insert in the first sentence thereof the language, "prior to" before the words "said date". This amendment makes clear that the showing of facts under § 1.131(b) must establish due diligence from a date prior to the effective date of the reference to affiant's subsequent reduction to practice or to the filing of his application as set forth in *In re Mulder*, 716 F.2d 1542, 219 USPQ 189 (Fed. Cir. 1983).

(2) Appellant's Brief and Reply Brief

A. Limitation on Length

Section 1.192(a), if amended as proposed, would delete the last sentence and insert the following sentence after the first sentence: "If the brief exceeds

30 pages, in addition to the appendix required by paragraph (c)(7) of this section, it will be returned to the appellant."

Section 1.193(b), if amended as proposed, would insert the following as the third sentence: "If the reply brief exceeds 15 pages, or the examiner determines that it is not directed only to new points of argument raised in the examiner's answer, the examiner will so notify the appellant and at the same time return the reply brief to the appellant."

The last sentence of § 1.192(a) is proposed to be deleted in view of the proposed addition of paragraph (c), which would impose more specific requirements for the contents of the brief.

The sentences proposed to be added to §§ 1.192(a) and 1.193(b) would limit the length of an appellant's brief and reply brief in an *ex parte* appeal to 30 and 15 pages, respectively, by providing that briefs or reply briefs which exceed these limits will be returned. These numbers of pages are for pages which comply with the requirements of 37 CFR 1.52. In determining whether a brief exceeds the 30-page limit, the pages of the appendix required by proposed § 1.192(c)(7) would not be counted.

While the length of the majority of briefs and reply briefs filed in *ex parte* appeals is substantially less than the 30- and 15-page limits proposed, in some instances briefs and reply briefs greatly exceed these limits. In many instances, these lengthy briefs and reply briefs are unnecessary; rather than focusing upon the issues involved in the appeal, they are verbose and repetitious, beclouding the issues and taking up an inordinate amount of the time spent by the examiner and examiners-in-chief in considering the appeal. The page limits set in proposed §§ 1.192(a) and 1.193(b) are intended to eliminate such lengthy briefs and reply briefs while at the same time giving appellants adequate scope to fully develop their arguments.

The proposed amendment to § 1.193(b) would also provide for return of the reply brief to the appellant if the examiner determines that the reply brief did not comply with the requirement of § 1.193(b) that it be limited to any new points of argument raised in the examiner's answer.

B. Contents of the Main Brief

Section 1.192, if amended as proposed, would add paragraphs (c) and (d). Paragraph (c) lists a number of items which would have to be included in the appellant's brief, while paragraph (d) would permit dismissal of the appeal for failure to include any of the items required by paragraph (c), in the order specified in paragraph (c). Paragraph (d) would also add the following sentence: "Any arguments or authorities not included in the brief may be refused consideration by the Board of Patent Appeals and Interferences." This sentence emphasizes that all arguments and authorities which an appellant wishes the Board to consider must be included in the brief. It should be noted that arguments not presented in the brief and made for the first time at oral hearing are not entitled to consideration. *In re Chiddix*, 209 USPQ 78 (Comr. 1980); *Rosenblum v. Hiroshima*, 220 USPQ 383 (Comr. 1983).

Proposed paragraph (c) would require that the brief contain, in order, seven specific items. This proposed requirement arose from the recommendations of a committee which was appointed by the Commissioner of Patents and Trademarks in 1986 to study and report on alternatives for reducing the backlog of *ex parte* appeals at the Board of Patent Appeals and Interferences. One of the committee's recommendations was the § 1.192 be amended to require that the appellant's brief include certain items. Items (3), (4), (5) and (6) of proposed § 1.192(c) are based upon the committee's recommendations. The committee indicated that the inclusion of those items in the brief would crystallize the issues involved in the appeal. By eliminating inadequate briefs, the Board of Patent Appeals and Interferences would not need to engage in what might be called "*de novo*" examination of a patent application, but rather could confine its activities to review of the appealed rejections.

The committee also recommended that certain items be required to be included in the examiner's answer. It is expected that the Manual of Patent Examining Procedure will be amended to require that the examiner's answer contain these and other items, substantially as indicated in Appendix A.

In addition to the committee's recommendations, some of the proposed items are supported by the evaluation of selected practices conducted as a part of the PTO's Quality Reinforcement Program. A summary of the results of that evaluation is published at 1078 Official Gazette 22 (May 19, 1987).

The specific items required by proposed § 1.192(c) are:

(1) A statement of the status of all the claims in the application, or patent under reexamination, i.e., for each claim in the case, appellant should state whether it is cancelled, allowed, rejected, etc. Each claim on appeal must be identified.

(2) A statement of the status of any amendment filed subsequent to final rejection, i.e., whether or not the amendment has been acted upon by the examiner, and if so, whether it was entered, denied entry, or entered in part.

Items (1) and (2) are included in proposed § 1.192(c) because in the past confusion has sometimes arisen as to which claims are on appeal, and the precise wording of those claims, particularly where the appellant has sought to amend claims after final rejection. The inclusion of items (1) and (2) in the brief would advise the examiner of what the appellant considers the status of the claims and post-final rejection amendments to be, allowing any disagreement on these questions to be resolved before the appeal was taken up for decision by the Board of Patent Appeals and Interferences.

(3) A concise explanation of the invention defined in the claims involved in the appeal. This explanation would be required to refer to the specification by page and line number, and, if there were a drawing, to the drawing by reference characters. Where applicable, it would be preferable to read the appealed claims on the specification and any drawing.

(4) A concise statement of the issues presented for review. Each stated issue would correspond to a separate ground of rejection which appellant wished the Board of Patent Appeals and Interferences to review. While the statement of the issues would have to be concise, it could not be so concise as to omit the basis of each issue. For example, the statement of an issue as "Whether claims 1 and 2 are unpatentable" would not comply with proposed § 1.192(c)(4). Rather, the basis of the alleged unpatentability would have to be stated, e.g., "Whether claims 1 and 2 are unpatentable under 35 U.S.C. 103 over Smith in view of Jones", or "Whether claims 1 and 2 are unpatentable under 35 U.S.C. 112, first paragraph, as being based on a non-enabling disclosure." The statement would be limited to the issues presented, and should not include any argument concerning the merits of those issues.

(5) If an appealed ground of rejection applied to more than one claim and appellant considered the rejected claims to be separately patentable, proposed § 1.192(c)(5) would require appellant to state that the claims do not stand or fall together, and the reasons why they were considered separately patentable. The absence of such a statement would be

taken by the PTO as a concession by the applicant that, if the ground of rejection were sustained as to any one of the rejected claims, it would be equally applicable to all of them. Proposed § 1.192(c)(5) continues the current practice of the Board of Patent Appeals and Interferences, and is consistent with the practice of the Court of Appeals for the Federal Circuit indicated in such cases *In re Sernaker*, 702 F.2d 989, 217 USPQ 1 (Fed. Cir. 1983), and *In re King*, 801 F.2d 1324, 231 USPQ 136 (Fed. Cir. 1986).

(6) The appellant's contentions with respect to each of the issues presented for review in proposed § 1.192(c)(4), and the basis for those contentions, including citations of authorities, statutes, and parts of the record relied on. Included in this proposed paragraph are five subparagraphs, (i) to (v). Subparagraphs (i) to (iv) concern the grounds of rejection most commonly involved in *ex parte* appeals, namely, 35 U.S.C. 112, first and second paragraphs, 35 U.S.C. 102, and 35 U.S.C. 103. Subparagraph (v) is a general provision concerning grounds of rejection not covered by subparagraphs (i) to (iv).

The purpose of subparagraphs (i) to (iv) is to insure that the appellant's argument concerning each appealed ground of rejection will include a discussion of the questions relevant to that ground. It is believed that compliance with the requirements of the particular subparagraphs which are pertinent to the grounds of rejection involved in an appeal would be beneficial both to the PTO and to appellants. It would not only facilitate a decision by the Board of Patent Appeals and Interferences by enabling the Board to determine more quickly and precisely the appellant's position on the relevant issues but also would help appellants to focus their arguments on those issues.

For each rejection not falling under subparagraphs (i) to (iv), proposed subparagraph (v) provides that the argument should specify the specific limitations in the rejected claims, if appropriate, or other reasons, which cause the rejection to be in error. This proposed language recognizes that for some grounds of rejection, it may not be necessary to specify particular claim limitations; for example, a rejection under 35 U.S.C. 101, as in *Ex parte Hibberd*, 227 USPQ 443 (BPAI 1985), or a rejection for violation of the duty of disclosure under 37 CFR 1.56(d), as in *Ex part Harita*, 1 USPQ2d 1887 (BPAI 1986).

(7) An appendix containing a copy of the claims involved in the appeal.

C. Contents of Reply Brief

Section 1.193(b), if amended as proposed, would insert the following as the second sentence: "The new points of argument shall be specifically identified in the reply brief."

Since the reply brief must be limited to any new points of argument raised in the examiner's answer, compliance with the requirement of this proposed sentence would facilitate both preparation of the reply brief by appellant and consideration of the reply brief by the PTO.

The final sentence of § 1.193(b), if amended as proposed, would provide that the reply may be accompanied by, rather than include, any amendment or material appropriate to the new ground of rejection. This proposed change in the rule makes clear that the amendment or other material must be presented in a separate paper, rather than in the reply itself.

(3) Time Period for Requesting an Oral Hearing

Section 1.194(b), if amended as proposed, would add the following sentence after the first sentence: "If the examiner's answer states a new ground of rejection and if appellant files a reply as provided by § 1.193(b), then the written request must be made within three months after the date of the filing of the reply."

The present rule does not provide the appellant an additional time period for requesting an oral hearing in the event that the examiner's answer states a new ground of rejection. If an answer states a new ground of rejection, § 1.193(b) provides that appellant's reply may also include any amendment or material appropriate to the new ground of rejection. However, under § 1.194(b) appellant must file the request for oral hearing within one month after the date of the answer whereas the reply thereto must be filed within two months from the date of the answer. Consequently, appellant must file a request for oral hearing before having the benefit of the examiner's views, if any, with respect to the reply.

Although the examiner does not normally issue a supplemental answer in response to a reply, see Manual of Patent Examining Procedure § 1208.01 (5th Ed., Aug. 1983), the proposed amendment to § 1.194(b) would permit the appellant to postpone filing a request for an oral hearing until three months after the date the reply is filed. This will give the appellant time to receive the examiner's response, if any, to the reply before the appellant has to decide whether to request an oral hearing.

(4) Procedure Following Final Rejection, Remand Under § 1.196(b)

Section 1.196(b)(1), if amended as proposed, would add the following sentence as the penultimate sentence of the section: "Should the examiner make the rejection final the applicant may again appeal to the Board of Patent Appeals and Interferences."

Under § 1.196(b), the Board of Patent Appeals and Interference may, in its decision on an *ex parte* appeal, make a new rejection of one or more appealed claims, in which case the appellant has the option of (1) submitting an appropriate amendment of the rejected claims, and/or a showing of facts, (2) requesting reconsideration, or (3) treating the decision as a final decision. If the appellant elects option (1), the case is remanded to the examiner for consideration. If the examiner does not consider that the amendment and/or showing of facts overcome the rejection, he or she will make the rejection final.

An applicant in whose application such a final rejection has been made may mistakenly believe that he or she is entitled to review of the final rejection by the Board of Patent Appeals and Interferences by virtue of the fact that the application was previously on appeal. The proposed amendment would correct this belief by making clear that after such a final rejection, an applicant who desires further review of the matter must file a new appeal to the Board of Patent Appeals and Interferences. The language of the proposed amendment is similar to the fourth sentence of § 1.196(d).

(5) Request for Access by Interference Party

Section 1.612(a), if amended as proposed, would add the following sentence as the last sentence of the section: "A party seeking access to any abandoned or pending application referred to in the opposing party's involved application or access to any pending application referred to in the opposing party's patent must file a motion under § 1.635." The proposed amendment would require an interference party seeking access either to a pending or abandoned application referred to in an opposing party's involved application or to a pending application referred to in an opposing party's involved patent to file a motion under 37 CFR 1.635. Such a motion is decided by an examiner-in-chief (§ 1.640(b)).

Under the present practice, access can only be obtained by filing an *ex parte* petition to the Commissioner accompanied by the petition fee set forth in § 1.17(i) and normally no decision is rendered on the petition until after the opposing party has had an opportunity to respond to the petition. The proposed amendment would expedite the interference proceeding by eliminating the delays inherent in the petition process. By requiring the party seeking access to file a motion under § 1.635, that party would first have to confer with the opposing party in an effort to resolve the issue of access as required by § 1.637(b). The examiner-in-chief would not have to decide the issue unless it could not be resolved by the parties.

(6) Access to Applications

Section 1.14(e), if amended as proposed, would delete the word "of" from the phrase "or of any papers relating thereto" and would add a reference to § 1.612(a) by adding the following sentence as the last sentence thereof: "See § 1.612(a) for access by an interference party to a pending or an abandoned application."

Section 1.14(e) as presently worded appears to limit a request by a member of the public to copies of, but not access to, any papers relating to any pending or abandoned application. Any such limitation was unintentional. The amended language will permit a member of the public to request both access to and copies of those papers.

(7) Request for Interference with an application or Patent

Sections 1.604(a) and 1.607(a), if amended as proposed, would provide for the situation in which a patent applicant requests an interference with another application or patent, respectively, on the basis of one or more claims which are already present in his or her application. The present rules require that when an applicant seeks an interference with another application or an unexpired patent, he or she must present a claim corresponding to the proposed count. The proposed rules would eliminate this requirement if a claim or claims corresponding to the proposed count are already in the application, and the applicant identifies them as such.

(8) Motion to Declare Additional Interference

Section 1.637(e)(1)(vi), if amended as proposed, would clearly state that a motion to declare an additional interference under 37 CFR 1.633(e)(1) between an additional application not involved in the interference and owned by a party and an opponent's application or patent involved in the interference shall designate the claims of the opponent's application or patent which define the same patentable invention defined by the proposed count or if the opponent's application does not contain any such claim, the moving party shall propose a claim to be added to the opponent's application. The present section states that when the opponent is a patentee, the motion shall designate the patent claims which define the same patentable invention defined by the proposed count. The present section does not require, although such a requirement is inferred from § 1.637(e)(2)(vi), that when the opponent is an applicant, the motion shall designate the application claims which define the same patentable invention defined by the proposed count or, if the opponent's application does not contain any such claim, the moving party shall propose a claim to be added to the opponent's application.

(9) Interference Estoppel

Section 1.658(c), if amended as proposed, would insert in the first sentence the language "by a motion under § 1.633(e)" after the words "(3) could have been properly raised" and substitute the language "on an invention which was claimed during the pendency of the original interference either (i) in the winning party's involved application or patent or (ii) in a noninvolved application owned by a losing party" for the words "with a motion under § 1.633(e)". In the second sentence, the language "who could have properly moved, but failed to move, under §§ 1.633 or 1.634" appearing after the words "losing party" would be deleted. Also in the second sentence, the language "that party's failure to properly move" would be deleted and the language "the issues settled by the judgement" inserted in its place. The proposed amendment incorporates into § 1.658(c) the guidelines set forth in the interference rules correction notice (50 Fed. Reg. 23122, May 31, 1985, 1059 Official Gazette 27, October 22, 1985) for the application of the doctrine of interference estoppel under 37 CFR 1.658(c) with respect to a losing party's failure to move under 37 CFR 1.633(e) to declare an "additional interference" between an additional application not involved in the interference and owned by the party and an opponent's application or patent involved in the interference on a separate patentable invention. The correction notice states that generally a losing party will be estopped for failure to move when the spearate patentable invention (subject matter) which could have been the subject of the "additional interference" as *claimed* (during the pendency of the interference) (1) in the opponent's involved application or patent or (2) in a non-involved application owned by the party during the pendency of the interference. Should a losing party after the termination of the interference acquire an application which discloses or claims the separate patentable invention and which could have been the subject of the "additional interference", estoppel would not apply because the party did not own the application during the pendency of the interference.

The correction notice illustrates the general applicability of interference estoppel in certain situations where a losing party fails to move under § 1.633(e) to declare an "additional interference" on a separate patentable invention as follows:

Losing party's non-involved application	Winning opponent's involved application or patent	Estoppel
Claimed	Claimed	Yes
Disclosed	Claimed	Yes
Claimed	Disclosed (Application).	Yes
	(Patent)	No*
Disclosed	Disclosed	No

* An invention disclosed and not claimed in a winning opponent's *patent* would not form the basis for a count because the patent does not contain a claim which can be designated to correspond to the count. Thus, a motion to declare an additional interference under § 1.633(e) could not have been properly brought, and interference estoppel therefore would not apply.

(10) Filing of Reissue Application During Interference

Section 1.662(b), if amended as proposed, would insert a comma after § 1.633(h)" and add the language "or would not be appropriate" at the end of the last sentence. The present rule contemplates that a reissue application may be filed by a patentee involved in an interference only for one of two reasons: either for the purpose of avoiding the interference, or for some other purpose relating to the interference, e.g., to add claims corresponding to a proposed new count. In the first case, judgment would be entered against the patentee, and in the second case, a motion under § 1.633(h) to add the reissue application to the interference would be appropriate.

However, it has been found that a patentee involved in an interference may file a reissue application for some other reason not contemplated by the rule, and for which the entry of judgment or a motion under § 1.633(h) would not be appropriate. For example, the patentee might file a reissue application for the purpose of amending claims of the patent which are directed to an invention which is patentably distinct from the issue of the interference and which is not disclosed by the opposing party. In such a situation, addition of the reissue application to the interference would be unnecessary. The proposed amendment of § 1.662(b) would accommodate this third possibility by providing that, instead of filing a motion under § 1.633(h) to add the reissued application to the interference, a patentee could show good cause why such a motion would not be appropriate under the particular circumstances involved.

(11) Applications Under Secrecy Order

Section 5.3(b), if amended as proposed, would delete the language "under secrecy order copies claims from an issued patent" and insert in its place the language "is under secrecy order seeks to provoke an interference with an issued patent" to make the section's language consistent with that of § 1.607(d). In addition, it is proposed to correct the reference to "§ 1.205(c)" to read " § 1.607(d)"

Environmental, Energy and Other Considerations

The proposed rule change will not have a significant impact on the quality of the human environment or conservation of energy resources.

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, Executive Order 12291, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce certified to the Small Business Administration that the proposed rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)), because it is intended to expedite the disposition of appeals and to simplify by clarification and amplification certain of the rules governing the conduct of an interference. The expedited disposition of appeals will permit the small entity to make earlier business decisions which may be affected by a pending appeal. The effect of the clarification and amplification of the rules relating to interferences will be to reduce the costs associated with involvement in an interference.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individual industries, federal, state or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule change will not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, since no significant additional record keeping or reporting requirements are placed upon the public.

List of Subjects in 37 CFR Parts 1 and 5

Administrative practice and procedure, Authority delegations (government agencies), Conflict of interests, Courts, Inventions and patents, Lawyers.

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, the patent and Trademark Office proposes to amend Title 37 of the Code of Federal Regulations as set forth below. It is proposed to amend 37 CFR, Parts 1 and 5, as follows with deletions indicated by brackets and additions by arrows.

PART 1—RULES OF PRACTICE IN PATENT CASES

1. The authority citation for 37 CFR Part 1 would continue to read as follows:

Authority: 35 U.S.C. 6, unless otherwise noted.

2. Section 1.14 is proposed to be amended by revising paragraph (e) to read as follows:

§ 1.14 Patent applications preserved in secrecy.

* * * * *

(e) Any request by a member of the public seeking access to, or copies of, any pending or abandoned application preserved in secrecy pursuant to paragraphs (a) and (b) of this section, or [of] any papers relating thereto, must (1) be in the form of a petition and be accompanied by the petition fee set forth in § 1.17(i) or (2) include written authority granting access to the member of the public in that particular application from the applicant or the applicant's assignee or attorney or agent of record. ►see § 1.612(a) for access by an interference party to a pending or abandoned application.◄

3. Section 1.131 is proposed to be revised to read as follows:

§ 1.131 Affidavit for declaration of prior invention to overcome cited patent or publication.

(a) When any claim of an application or a patent under reexamination is rejected on reference to a domestic patent which substantially shows or describes but does not claim ►the same patentable invention, as defined in § 1.601(n), as◄ the rejected invention, or on reference to a foreign patent or to a printed publication, and the inventor of the subject matter of the rejected claim, the owner of the patent under reexamination, or the person qualified under §§ 1.42, 1.43 or 1.47, shall make oath or declaration as to facts showing a completion of the invention in this country before the filing date of the application on which the domestic patent issued, or before the date of the foreign patent, or before the date of the printed publication, then the patent or publication cited shall not bar the grant of a patent to the inventor or the confirmation of the patentability of the claims of the patent, unless the date of such patent or printed publication is more than one year prior to the date on which the inventor's or patent owner's application was filed in this country.

(b) The showing of facts shall be such, in character and weight, as to establish reduction to practice prior to the effective date of the reference, or conception of the invention prior to the effective date of the reference coupled with due diligence from ►prior to◄ said date to a subsequent reduction to practice or to the filing of the application. Original exhibits of drawings or records, or photocopies thereof, must accompany and form part of the affidavit or declaration or their absence satisfactorily explained.

4. Section 1.192 is proposed to be amended by revising paragraph (a) and adding new paragraphs (c) and (d) to read as follows:

§ 1.192 Appellant's brief.

(a) The appellant shall, within 2 months from the date of the notice of appeal under § 1.191 in an application, reissue application, or patent under reexamination, or within the time allowed for response to the action appealed from, if such time is later, file a

brief in triplicate. ►If the brief exceeds 30 pages, in addition to the appendix required by paragraph (c)(7) of this section, it will be returned to the appellant.◄ The brief must be accompanied by the requisite fee set forth in § 1.17(f) and must set forth the authorities and arguments on which the appellant will rely to maintain the appeal. [The brief must include a concise explanation of the invention which should refer to the drawing by reference characters, and a copy of the claims involved.]

* * * * *

►(c) The brief shall contain the following items under appropriate headings and in the order here indicated:

(1) *Status of claims.* A statement of the status of all the claims, pending or cancelled, and identifying the claims appealed.

(2) *Status of amendments.* A statement of the status of any amendment filed subsequent to final rejection.

(3) *Summary of invention.* A concise explanation of the invention defined in the claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters.

(4) *Issues.* A concise statement of the issues presented for review.

(5) *Grouping of claims.* For each ground of rejection which appellant contests and which applies to more than one claim, it will be presumed that the rejected claims stand or fall together unless a statement is included that the rejected claims do not stand or fall together, accompanied by reasons as to why appellant considers the rejected claims to be separately patentable.

(6) *Argument.* The contentions of the appellant with respect to each of the issues presented for review in paragraph (c)(4) of this section, and the basis therefor, with citations of the authorities, statutes, and parts of the record relied on. Each issue should be treated under a separate heading.

(i) For each rejection under 35 U.S.C. 112, first paragraph, the argument shall specify the errors in the rejection and how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, (A) describe the subject matter defined by each of the rejected claims, (B) enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims, and (C) set forth the best mode contemplated by the appellant of carrying out his or her invention.

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the argument shall specify the errors in the rejection and how the claims particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the argument shall specify the errors in the rejection and why the rejected claims are patentable under 35 U.S.C. 102, including any specific limitations in the rejected claims which are not described in the prior art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the argument shall specify the errors in the rejection and, if appropriate, the specific limitations in the rejected claims which are not described in the prior art relied on in the rejection, and shall explain how such limitations render the claimed subject matter unobvious over the prior art. If the rejection is based upon a combination of references, the argument shall explain why the references, taken as a whole, do not suggest the claimed subject matter, and shall include, as may be appropriate, an explanation of why features disclosed in one reference may not properly be combined with features disclosed in another reference. A general argument that all the limitations are not described in a single reference does not satisfy the requirements of this paragraph.

(v) For any rejection other than those referred to in paragraphs (c)(6) (i) to (iv) of this section, the argument shall specify the errors in the rejection and the specific limitations in the rejected claims, if appropriate, or other reasons, which cause the rejection to be in error.

(7) *Claims appealed.* An appendix containing a copy of the claims involved in the appeal.

(d) Failure to comply with any of the requirements of paragraph (c) of this section may result in dismissal of the appeal. Any arguments or authorities not included in the brief may be refused consideration by the Board of Patent Appeals and Interferences.◄

5. Section 1.193 is proposed to be amended by revising paragraph (b) to read as follows:

§ 1.193 Examiner's answer.

* * * * *

(b) The appellant may file a reply brief directed only to such new points of argument as may be raised in the examiner's answer, within one month from the date of such answer. ►The new points of argument shall be specifically identified in the reply brief. If the reply brief exceeds 15 pages, or the examiner determines that it is not directed only to new points of argument raised in the examiner's answer, the examiner will so notify the appellant and at the same time return the reply brief to the appellant.◄ [However, if] ►If◄ the examiner's answer states a new ground of rejection appellant may file a reply thereto within two months from the date of such answer; such reply may [include] ►be accompanied by◄ any amendment or material appropriate to the new ground.

6. Section 1.194 is proposed to be amended by revising paragraph (b) to read as follows:

§ 1.194 Oral hearing.

* * * * *

(b) If appellant desires an oral hearing, appellant must file a written request for such hearing accompanied by the fee set forth in § 1.17(g) within one month after the date of the examiner's answer. ►If the examiner's answer states a new ground of rejection and if appellant files a reply as provided for by § 1.193(b), then the written request must be made within three months after the date of the filing of the reply.◄ If appellant requests an oral hearing and submits therewith the fee set forth in § 1.17(g), an oral argument may be presented by, or on behalf of, the primary examiner if considered desirable by either the primary examiner or the Board.

* * * * *

7. Section 1.196(b)(1) is proposed to be revised to read as follows:

§ 1.196 Decision by the Board of Patent Appeals and Interferences.

* * * * *

(b) * * *

(1) The appellant may submit an appropriate amendment of the claims so rejected or a showing of facts, or both, and have the matter reconsidered by the examiner in which event the application will be remanded to the examiner and the decision of the Board of Patent Appeals and Interferences shall not be considered final for the purpose of judicial review. The statement shall be binding upon the examiner unless an amendment or showing of facts not previously of record be made which, in the opinion of the examiner, overcomes the new ground for rejection stated in the decision. ►Should the examiner make the rejection final the applicant may again appeal to the Board of Patent Appeals and Interferences.◄ When appropriate, upon conclusion of proceedings on remand before the examiner, the Board of Patent Appeals

and Interferences may enter an order otherwise making its decision final.

* * * * *

8. Section 1.604(a) is proposed to be revised to read as follows:

§ 1.604 Request for interference between applications by an applicant.

(a) An applicant may seek to have an interference declared with an application of another by—

(1) Suggesting a proposed count and presenting [a] ►at least one◄ claim corresponding to the proposed count ► or identifying at least one claim in his or her application that corresponds to the proposed count◄,

(2) Identifying the other application and, if known, a claim in the other application which corresponds to the proposed count, and

(3) Explaining why an interference should be declared.

* * * * *

9. Section 1.607(a) is proposed to be revised to read as follows:

§ 1.607 Request by applicant for interference with patent.

(a) An applicant may seek to have an interference declared between an application and an unexpired patent by—

(1) ►Identifying the patent,

(2)◄ Presenting a proposed count ►

(3) identifying at least one claim in the patent corresponding to the proposed count, (4) presenting at least one◄ [and a] claim corresponding to the proposed count ► or identifying at least one claim already pending in his or her application that corresponds to the proposed count,◄ and, if any claim of the patent or application ►identified as corresponding to the proposed count◄ does not correspond exactly to the proposed count, explaining why [an interference should be declared, (2) identifying the patent and indicating which claim in the application and which claim or claims of the patent correspond to the proposed count] ►each such claim corresponds to the proposed count◄, and [3] ►(5)◄ applying the terms of ►and◄ [the] application claim ►(i) identified as◄ corresponding to the count and (ii) not previously in the application◄ to the disclosure of the application.

* * * * *

10. Section 1.612(a) is proposed to be revised to read as follows:

§ 1.612 Access to applications.

(a) After an interference is declared, each party shall have access to and may obtain copies of the files of any application set out in the notice declaring the interference, except for affidavits filed under § 1.131 and any evidence and explanation under § 1.608 filed separate from an amendment. ►A party seeking access to any abandoned or pending application referred to in the opposing party's involved application or access to any pending application referred to in the opposing party's patent must file a motion under § 1.635.◄

* * * * *

11. Paragraph (e)(1)(vi) of § 1.637 is proposed to be revised to read as follows:

§ 1.637 Content of motions.

* * * * *

(e) * * *

(1) * * *

(vi) [When the opponent is a patentee, designate the claims of the patent which define the same patentable invention defined by the proposed count] ►Identify all claims in the opponent's application or patent which should be designated to correspond to each proposed count; if the opponent's application does not contain any such claim, the motion shall propose a claim to be added to the opponent's application.◄ * * *

* * * * *

12. Paragraph (c) of § 1.658 is proposed to be revised to read as follows:

§ 1.658 Final decision

* * * * *

(c) A judgment in an interference settles all issues which (1) were raised and decided in the interference, (2) could have been properly raised and decided in the interference by a motion under § 1.633 (a) through (d) and (f) through (j) or § 1.634 and (3) could have been properly raised ► by a motion under § 1.633(e) ◄ and decided in an additional interference [with a motion under § 1.633(e)] ► on an invention which was claimed during the pendency of the original interference either (i) in the winning party's involved application or patent or (ii) in a non-involved application owned by a losing party ◄. A losing party [who could have properly moved, but failed to move, under §§ 1.633 or 1.634] shall be estopped to take *ex parte* or *inter partes* action in the Patent and Trademark Office after the interference which is inconsistent with [that party's failure to properly move] ► the issues settled by the judgment ◄, except that a losing party shall not be estopped with respect to any claims which correspond, or properly could have corresponded, to a count as to which that party was awarded a favorable judgment.

13. Paragraph (b) of § 1.662 is proposed to be revised to read as follows:

§ 1.662 Request for entry of adverse judgment; reissue filed by patentee.

* * * * *

(b) If a patentee involved in an interference files an application for reissue during the interference and omits all claims of the patent corresponding to the counts of the interference for the purpose of avoiding the interference, judgment may be entered against the patentee. A patentee who files an application for reissue other than for the purpose of avoiding the interference shall timely file a preliminary motion under §1.633(h)►,◄ or show good cause why the motion could not have been timely filed ► or would not be appropriate ◄.

* * * * *

PART 5—SECRECY OF CERTAIN INVENTIONS AND LICENSES TO EXPORT AND FILE APPLICATIONS IN FOREIGN COUNTRIES

14. The authority citation for 37 CFR Part 5 would continue to read as follows:

Authority: 35 U.S.C. 6, 41, 181–188 and the Export Administration Act of 1979, as amended, the Arms Export Control Act, as amended, the Atomic Energy Act of 1954, as amended, and the Nuclear Non-Proliferation Act of 1978, and the delegations in the regulations under these acts to the Commissioner (15 CFR 370.10(j), 22 CFR 125.04, and 10 CFR 810.7).

15. Paragraph (b) of § 5.3 is proposed to be revised to read as follows:

§ 5.3 Prosecution of application under secrecy orders; withholding patent.

* * * * *

(b) An interference will not be declared involving national applications under secrecy order. However, if an applicant whose application [under secrecy order copies claims from] ► is under secrecy order seeks to provoke an interference with ◄ an issued patent, a notice of that fact will be placed in the file wrapper of the patent. (See [§ 1.205(c)] ► § 1.607(d) ◄).

Appendix A—Proposed Requirements for Examiner's Answer

Chapter 1200 of the Manual of Patent Examining Procedure would be amended to require that the examiner's answer include, in the order indicated, the following items:

(1) *Status of claims.* A statement of whether the examiner agrees or disagrees

with the statement of the status of claims contained in the brief and a correct statement of the status of all the claims pending or cancelled, if necessary.

(2) *Status of Amendments.* A statement of whether the examiner agrees or disagrees with the statement of the status of amendments contained in the brief, and an explanation of any disagreement.

(3) *Summary of invention.* A statement of whether the examiner agrees or disagrees with the summary of invention contained in the brief, an explanation of why the examiner disagrees, and correct summary of invention, if necessary.

(4) *Issues.* A statement of whether the examiner agrees or disagrees with the statement of the issues in the brief and an explanation of why the examiner disagrees, including:

(i) Identification of any issues which are petitionable rather than appealable, and

(ii) Identification of any issues or grounds of rejection which the examiner no longer considers applicable.

(5) *Grouping of Claims.* A statement of whether the examiner agrees or disagrees with any statement in the brief that certain claims do not stand or fall together, and, if the examiner disagrees, an explanation as to why those claims are not separately patentable.

(6) *Claims appealed.* A statement of whether the copy of the appealed claims contained in the appendix to the brief is correct and if not, a correct copy of any incorrect claim.

(7) *References of record.* A listing of the references of record relied on, including (where appropriate, and especially in the case of non-patent references) the page or pages in each reference relied on.

(8) *New references.* A statement of whether or not any new reference is being applied and a listing of each such reference being cited for a new ground of rejection in the examiner's answer, including (where appropriate, and especially in the case of non-patent references) the page or pages in each reference relied on.

(9) *Grounds of rejection.* For each ground of rejection applicable to the appealed claims, and explanation of the ground of rejection, or reference to a final rejection or other single prior action for clear exposition of the rejection.

(i) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer, or the single prior action, shall explain how the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any, (a) do not describe the subject matter defined by each of the rejected claims, (b) would not enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims, and (c) do not set forth the best mode contemplated by the appellant of carrying out his or her invention.

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer, or single prior action, shall explain how the claims do not particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the examiner's answer, or single prior action, shall explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the prior art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the examiner's answer, or single prior action, shall state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection, shall identify any difference between the rejected claims and the prior art relied on and shall explain how the claimed subject matter is rendered unpatentable over the prior art. If the rejection is based upon a combination of references, the examiner's answer, or single prior action, shall explain the rationale for making the combination.

(v) For each rejection under 35 U.S.C. 102 or 103 where there may be questions as to how limitations in the claims corresponds to features in the prior art, the examiner, in addition to the requirements of (9)(iii) and (iv) above, should compare at least one of the rejected claims feature by feature with the prior art relied on in the rejection. The comparison shall align the language of the claim side by side with a reference to the specific page, line number, drawing reference number and quotation from the prior art, as appropriate.

(vi) For each rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer, or single prior action, shall specifically explain the basis for the particular rejection.

(10) *New ground of rejection.* A statement of whether or not any new ground of rejection is being made in the examiner's answer and a complete statement and explanation of any such new ground. The requirements of section (9) shall be complied with for any new ground of rejection.

(11) *Response to argument.* A statement of whether the examiner agrees or disagrees with each of the contentions of appellant in the brief with respect to the issues presented and an explanation of the reasons for disagreement with any such contention. If any ground or rejection is not argued and responded to by appellant, the response shall point out each claim affected.

(12) *Period of response to new ground of rejection.* A statement setting the period for appellant to file a reply to any new ground of rejection, if necessary.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
